Professional Summary

Objective:

Motivated Computer Science Engineering student at Galgotias University, set to graduate in June 2025. Seeking an opportunity to apply my hard skills in software engineering, build on my internship experience, and contribute to innovative projects. I bring a combination of technical expertise and soft skills that enable me to collaborate effectively in a dynamic team environment while having fun along the way.

Education:

Bachelor of Technology (B.Tech)

Galgotias University

Expected Graduation Date: June 2025

- Major: Computer Science Engineering

- Relevant Courses in Data Structures and Algorithms

Internship Experience:

Software Development Intern

ReadyCoder

[Dates of Internship: August, 2022 - September, 2022]

- Developed an e-commerce website, demonstrating proficiency in web development using technologies such as HTML, CSS, JavaScript, and Node.js.

- Collaborated closely with a diverse team, fostering consistent teamwork and cooperative problem-solving.

- Ensured product quality and met product requirements, while also receiving valuable feedback to improve the software solution.

- Gained insights into agile development practices and project management methodologies.

Projects:

Machine Learning Weather Forecasting Model

- Leveraged machine learning techniques, including data structures, regression, and data analysis, to create a robust weather forecasting model.

- Ethnically diverse data sources were used to enhance model accuracy, reflecting a commitment to inclusivity.

- Demonstrated dedicated guidance and creative problem-solving throughout the project.

- Quickly learned and adopted new engineering methods and incorporated them into the work processes.

- Worked collaboratively with teammates to achieve technical solutions that aligned with project goals and military principles.

Skills:

- Web Development: Proficient in web development technologies and frameworks, including HTML, CSS, JavaScript, and Node.js.

- Machine Learning: Skilled in machine learning techniques, data analysis, and model development, reflecting a dedication to growth and learning.

- Problem Solving: Strong problem-solving skills demonstrated through coursework and projects, embracing a growth mindset.

- Team Collaboration: Effective teamwork and communication skills developed through group projects and internships, inspiring excellence in the team.

- Time Management: Demonstrated ability to manage time effectively while balancing coursework and internship responsibilities.

Soft Skills:

- Collaborative: Known for my ability to collaborate seamlessly with diverse teams, including ART community connections.

- Consistent: Consistently deliver high-quality work and meet project milestones in accordance with corporate ordinances.

- Cooperative: Foster a cooperative work environment that encourages team success and corporate goals.

- Technical: Combine strong technical skills with a growth mindset to excel in software engineering.
